Problem & Validation

Students want to date and make friends online — but trust is missing.

- Fake profiles, catfishing and scams on mainstream dating apps
- Open video chat means face-to-face time with anonymous strangers
- *It happened to me: I was catfished by a fake profile.*

Validation — McAfee 2026 survey (Indian adults; not students)

- 75% have encountered fake or AI-generated profiles
- 33% report being catfished
- 1 in 7 lost money to romance scams — averaging Rs 2,80,650

Demand for meeting people on live video

- Omegle drew ~50M visitors in its final month (Oct 2023) before shutting down

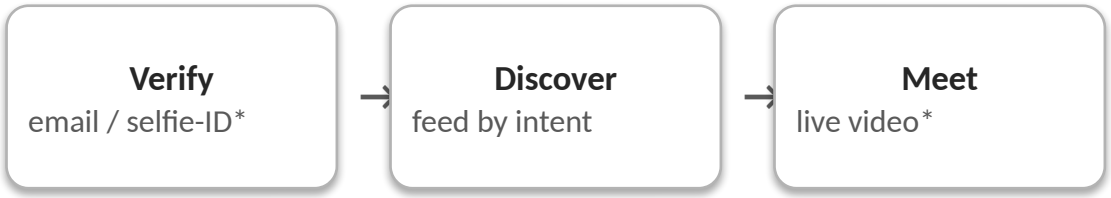

Sources: McAfee 2026 survey; Similarweb via TechCrunch.

Solution & Innovation

Huh? — a verified, college-students-only network for dating and socializing.

- Sign up with your college email or student ID — every profile verified
- Intent-based profile feed: dating or friendship, at your college and nearby
- Instant live video matching: tap once, meet a new verified student face to face
- The spontaneous Omegle-style experience — but only with real students
- Working product in testing; launching November 2026 with all features

In build now: live video matching and selfie-ID verification.

* selfie-ID verification and live video are in build now — launching with all features in Nov 2026.

PoC Hypothesis & Metrics

Hypothesis: a verified, students-only network earns students' trust — and their time.

Success metrics — first 2 months after Nov 2026 launch

10+
colleges with verified sign-ups

30%
of sign-ups return in week 4

40%
try live video in their first week

5%
convert to premium — assumption, to be tested

Market — assumptions we will validate

- 4.5 crore higher-education students in India (AISHE 2023-24)
- 10% on dating apps (Mumbai study: 12.7%) x 5% paying x Rs 1,500/yr ≈ Rs 34 crore/yr
- Context: India's online-dating market est. US$548M (Grand View Research, 2023)

Execution & Business Plan

Milestones

- **Build (Oct 2026):** finish live video matching, selfie-ID verification, reporting, blocking and skip
- **Test & launch (Nov 2026):** all features, live to students across colleges
- **Iterate & earn (Dec 2026):** marketing at Mood Indigo and Techfest; monetization starts
- **Jan 2027 onward:** new features driven by student feedback

Business model

- Free to join; premium planned at Rs 1,500/year (assumption, to be tested)

App	Student-verified	Dating feed	Live video
Tinder U (Mar 2025)	Yes	Yes	No
CooMeet	No	No	Yes
UniLink.chat / HostelHub	Yes	No	Yes
Spyll	Yes	No	No (voice)
Umatch	Yes	Yes	No
Huh?*	Yes	Yes	In build

* Huh?'s live video is in build now. We found none combining dating, socializing and live video in one verified, students-only network.

Team, Budget & Impact

Team: Aditya Bhati, fifth-year BTech at IIT Bombay, and Jeevesh. We code and design Huh? ourselves; both of us have done internships.

Gaps we are filling: marketing, trust and safety (moderation), legal and data protection, and a professional designer.

Use of funds: paid infrastructure — email, database, media storage and live video (today on free tiers of Resend, MongoDB and Cloudinary, which will not scale) — plus verification and moderation tools.

Support needed: mentorship in trust and safety, legal and data protection, design and marketing; introductions to student communities at other campuses.

Proposed output: the fully featured verified network, live across colleges from Nov 2026.

Impact & vision: a verified social space for India's 4.5 crore students. Long term: the trusted place where every college student in India meets people — for dating and friendship — then the same verified model abroad.

Budget Sheet

Item	Covers	Amount (Rs/yr)
Live video infrastructure	Real-time video matching service	[TO FILL]
Email, database, media storage	Paid Resend, MongoDB and Cloudinary tiers	[TO FILL]
Verification	Selfie-ID checks	[TO FILL]
